A perfect solution for designers, architects, engineers, and property owners Yu Athletic Lockers are constructed from high quality CarbonZero® phenolic. The unique electron beam cured surfaces provide superior chemical and scratch resistance, UV resistance and provides greatly improved wear along with the best chemical resistant / anti-graffiti surface in the industry. Yu Athletic Lockers are designed for professional athletes to withstand the most demanding conditions and provide improved and fully customizable functionality.

Features:

- 100% Waterproof for indoor, outdoor and high humidity Applications
- Extreme Impact Resistant
- Class A fire rated
- Resistant to harsh cleaning chemicals
- Shipped flat or fully assembled
- 10 Year warranty

Yu Athletic Lockers are the best choice for professional sports facilities. Offering a high degree of design flexibility and durability, strength is built into every component. CarbonZero CompactX² is manufactured with high tech polymers and electron beam technology providing very high scratch and wear resistance. These lockers are fabricated to stand the test of time. The dense components, combined with stainless steel fasteners, withstand the most extreme conditions of moisture and humidity. CarbonZero CompactX² is impact, water and corrosion resistant, and does not support bacteria, fungi or pests of any kind.

Features:

- ◆ Concealed Venting
- ◆ Extreme Impact Resistant
- ◆ Class A fire rated
- ◆ Chemical Resistant
- ◆ Graffiti Proof
- ◆ Multiple door/drawer/style Configurations
- ◆ Wall units/back-to-back island units
- ◆ Multiple hardware accessories

Cam Lock

Cam locks can be adapted for both wooden and metal furniture, and are the ideal solution given their versatility and adaptability to all of our clients' needs.

Mechanical Lock

Mechanical locks are designed for day use lockers. The user chooses an available locker and operates it with a self-selected user code. Once the locker is vacated, it becomes available for a different user.

Digital Lock

Digital locks operate with an alphanumeric standard keypad or touch RFID interface. The interface also contains a key slot to operate locks with an ADA compliant User Key.

Base Dimensions

Width:
15"

Depth:
17"

Height:
5.5"
